SINA MAL POKURAK

Our team has made a significant impact over the past five years by distributing essential packs worth Rs. 5,000 to over 200 families in need each year. This initiative has been driven by our commitment to supporting the community and providing help to those facing challenging circumstances. Each pack contained vital supplies, ensuring families had the resources to get through difficult times. We are proud of our collective efforts and grateful for the opportunity to make a positive difference in so many lives .

This year, our project expanded to the village of Ella, where we are to support 120 families with essential assistance . The project has a total budget of LKR 1,000,000, which will cover the cost of the essential packs and we distribute high-quality growing seeds and organic soil we believe that collaboration is crucial to the success of this initiative. By partnering with other organizations and individuals, we can reach our goal of helping even more families in need.

We are excited about this project and confident that, with the support of our partners, we can continue making a positive impact in the lives of those who need it most.

Basketball

"The strength of the team is each individual member.
The strength of each member is the team." - Phil Jackson
Basketball is a team sport that is played between 2 teams, each consisting of 5 players. The objective of a team is to shoot a basketball through the hoop of the other side, while at the same time, preventing the other team from shooting into theirs. It is played on a rectangular court. Every successful shot earns a team 2 points. If a player is fouled by the other team's player, then he or she is given one or two free throws. At the completion of the playtime, the team with the highest points on the board wins. If there is a then some overtime is also givery
This game was invented by an American gym teacher and was first played in December, in the year 1891.
It originated in Massachusetts, United States. Dr James Naismith created the sport to keep his physical education class active on a very gloomy, dull and rainy day. He initially tied a peach basket to a 10-foot pole and made his class play with a football. It is mostly played in an indoor court, but the usage of outdoor courts is also quite popular now. It is a sport that is also played in the Olympics, the summer Olympics and the Paralympics.
Players generally move the ball by either passing it or dribbling it. There are a number of shots that are presumed in the offensive position including the jump shot, the lay-up shot and the dunk shot. While assuming the defensive position, players can either try to steal the ball from the other team or jump and block their Shots. The tallest player generally assumes the centre most playing position. The highest association that governs basketball is FIBA (International Basketball Federation). The NBA (National Basketball Association) is the most significant professional basketball league with respect to salaries, popularity, the talent of players and the level of competitiveness.
